School Music Dramatic Festival at Medicine Hat

Redcliff School Pupils Made
Good Showing

The School Music and Dramatic Festival, held in Medicine Hat on Thursday and Friday, was a splendid success.

After two full days of competitions a grand concert was staged in the Empress Theatre on Friday evening in which the winners of the different events took part. As usual there was a crowded house and the several numbers were greatly appreciated by the relatives and friends of the children.

Although the Redcliff chorus had no competitors, the adjudicator, Mr. Clifford Higgins of Calgary, gave it great praise and awarded it a high mark.

As in former years, Redcliff made a good showing.

The dramas lacked the Redcliff entries to give it just that something which fires the imagination and thrills the senses.

Among the soloists, Mary Martin took first place in the Girls' Open Soprano, with 88 points, which was 2 points above Mary Jude of Bethany, who took second place.

Bruce Sheehy won first place in the Grade 7, 8 and 9 solo with 88½ points. ½ a point above Gloria Lawrence of Medicine Hat and in the Boys' Open Treble S: he took second place with 82 points, only 1 point behind the winner, Wayne Williams of Medicine Hat. Bruce and May received particularly high praise from Mr. Higgins.

In the Grade 1 Solo Class, Andrey Gordon won second place with 82 points, which was only 1 point behind the winner, Freda Wittke of Irvine.

In the Grade 2 and 3 Solo, both winners were Redcliff girls, Dolores Turner, first with 84 points and Evelyn Hitchins second with 83 points.

Among the winners for reciting in Grades 7, 8 and 9, Bessie Gordon came second, tying with Iva Rudd of Medicine Hat with 79 points, one point behind the winner, Adele Harvad also of Medicine Hat.

And so the festival is over for

Texas Oil Men Now at Brooks

Difficulties Experienced in
Housing New Comers

The "Mystery Oil Men" after spending the winter in Texas and California returned to Canada last week and have taken up residence at Brooks. There are 15 men in the crew who with their wives and families have increased the population of that town by 31 souls.

Since vacant houses in Brooks have been very scarce for many years a good deal of difficulty was experienced in securing houses for four families. The remainder of the group have all but filled the hotels.

The men will complete the geographical survey of Southern Alberta which they commenced last spring.

Lorne Harvard of Medicine Hat took first place in the baritone solo under 19 years competition at the provincial musical festival at Calgary yesterday.

another year, no doubt much to the relief of both children and teachers and they may settle down to the business of final examinations and school closing.

The Review congratulates the pupils on their splendid showing, and the teachers, particularly Miss Kane, on the success of their instruction.

Young People Postpone Vesper Service

Gordon Memorial Y. P. A.
Held Interesting Meeting

Owing to the change in the weather, the Y. P. Vesper Service was postponed. The meeting was held as usual in the church basement.

After the program relays were played and light refreshments were served, three new members were welcomed with the Young People's Club.

The next meeting will be a Hobby Lobby with Kaja Madson in charge. Come one and all and enjoy the fellowship.

NOTICE

BOY SCOUTS

A general meeting for parents of boys and others, who are interested, in re-organizing a local Scout troop in Redcliff will be held in the Town Hall on Tuesday night May 16th at 8 sharp.

Business: General information and discussion of matters pertaining to the Scout movement. Election of a Group Committee.

What's The Matter With Redcliff

Under this heading we invite the opinions of our fellow town-people. Kindly keep in mind that we do not print any anonymous letters or articles. So please sign your name as a mark of good faith but we will not publish your name unless you wish us to do so.

Sir:
During the past few weeks some of our councillors have been very active in promoting the sale of shares in a co-operative store to be established in Medicine Hat. This is a very surprising situation. I was always under the impression that we as ratepayers elected our council to administer the affairs of the Town for the benefit of the Town of Redcliff and its citizens as a whole (not for the benefit of Medicine Hat) and that they took an oath of office to do this.

If these councillors would use the same energy in the formation of community enterprise we would probably have a lot better town in which to live and the councillors would also be fulfilling the duties for which they were elected.

It is time the citizens stopped knocking the town and their fellow citizens and get together to boost the advantages we now have.

We have, I believe, one of the best towns in the west. Our unemployment figures are lower compared to other towns of the same size. Our water, fuel and rent are cheaper and wages are just as high if not higher than in most towns and cities in the west.

If it is felt we need a co-operative store, by all means let us have one, but have it in Redcliff where it will be of some benefit to the town and the citizens can take advantage of the facilities it offers.

But regardless of what form of activity we promote, let us always remember that our first duty as citizens is to boost our town and do our utmost to make it the town in which we desire to live and raise our children.

Let us get together and form a Booster's Club and instead of knocking, praise the things we have.

Banff Art School Offers Scholarships

THEATRE:
The Banff School of Fine Arts, Theatre Division, will offer two scholarships to the value of \$20 each, or the equivalent of the tuition fee, at the 1939 School, to be competed for by high school students in the province of Alberta.

Conditions governing the awards must be as follows: Students must be in Grade XI or XII during the present school year. They must be over 16 years of age and have taken an active part in either school or community dramatics for the past two years and have shown promising talent in their work.

Students applying for the scholarships must have their application accompanied by a letter from their high school principal stating that in his or her opinion the applicant possesses those qualities of health, physique and personality which would enable him or her, if successful in winning the award, to benefit by the course in Banff and which would enable such persons to give leadership in community dramatics.

In addition to the foregoing requirements the applicant must submit an essay of approximately 1000 words on the subject: "What does a High School Dramatic Club do for you and your Community." The essay must be written on one side of the paper only and must bear the certification of the principal saying that this is the work of the student concerned.

now have we work together for the things we would like to have. Then it won't be long until Redcliff will be known as the best town in the west.

Town Council Meeting Monday And All Present

Several Buildings Sold To
Local Citizens

Town Council met last Monday evening with the mayor and all councillors present. Mr. Jack Hope acted as Mayor until the arrival of Mayor Sangster.

A Council Committee made arrangements to place a water line on 6th and 7th streets near the Pressed Brick Co.'s plant.

A request was made for clothing for children of several local families but Council decided to leave the matter over for further consideration.

Mr. W. King asked that a message of loyalty from the citizens of Redcliff be forwarded through a Calgary paper.

The School Board asked for \$700.00 for school purposes and same was granted.

The Government of Alberta, through the Department of Education and in conjunction with the Dominion Provincial Youth Training program, is intending to extend the program of recreational activities to various new committees in this province, during the coming winter season. The program will be based on that of the British Columbia plan which was adopted last year. The Council appointed J. R. MacKenzie and D. Broadfoot of the Chamber of Commerce to make the necessary arrangements.

The hours for watering gardens during the coming summer will be from 6 A.M. till 10 A.M. and from 5 P.M. till 9 p.m.

Arrangements were made for selling buildings to the following citizens at the prices shown: — A. Parsons \$100.00, K. Madson \$150.00, John Matukwa \$250.00. From May 15th till Sep. 15th, the curfew will be rung at 10 p.m.

MOTHER'S DAY AT GORDON MEMORIAL

Sunday, May 14th being Mother's Day there will be a special service in Gordon Memorial at 11:00 A.M. There will be no Sunday School as the School will meet at 10:45 to mark the attendance and then they will adjourn to the Auditorium for the Mother's Day service. This service will be in charge of Rev. H. V. Ellison and Rev. Colburn will deliver the address. A very cordial invitation is extended to everyone to attend this special service.

In the evening at 7:30 the C.G. I.T. will hold a Candle Lighting service and Miss Lillie Carson, den of Calgary will be the guest speaker.

During the absence of Rev. H. S. Hannett, services in St. Ambrose Church will be conducted by Canon Butcher of St. Barnabas, Medicine Hat. Evensong will be conducted at 8 p.m. each Sunday afternoon for the next two weeks.

2 DAYS - REDCLIFF PARK CARNIVAL - 2 DAYS
MAY 19th AND 20th, AT BROADWAY STORE, GOOD PRIZES, NEW GAMES

Cost Of Government

Probably every people who join in the popular clamour for government expenditure for relief, for public and social services, for subsidies and for numerous other contingencies, often with the idea of benefiting themselves beyond actual needs or to gain something for their community realize the expense they are saddling upon themselves and upon their children. If they did, it is probable that many of the demands which are made upon the federal, provincial and municipal governments would be considerably curtailed and some of them would not be made at all. The people themselves would be more vigilant, and in general, the government racketeering which has so recently resulted in criminal court proceedings in one of the municipalities in Saskatchewan and the public conscience would result in curtailment of some of the demands which the country is unable to afford for the present time.

Governments are not altogether to blame if they yield to constant and enormous pressure which is constantly being brought to bear upon them for unnecessary expenditures or for services for which the means are not forthcoming without pledging the country, the province or the municipality to indebtedness beyond ability to repay.

It is the people themselves who thoughtlessly make demands without counting the cost and who regard the governments as a widow's cruse of oil who are culpable, and until they fully realize what the cost of government is to them as individuals, the avalanche of demands for more services of one kind and another is not likely to abate.

Unappreciated Costs

One of the difficulties of bringing home to the public consciousness the burden which the people must carry as a result of these demands for multiple government and increasing services is the fact that much of the tax imposed to pay for it is the indirect form, what might appropriately be termed hidden taxes.

The average man or woman who goes into a store to spend a dime or a dollar is not conscious, or at the best only vaguely aware, of the fact that a percentage of that dime or that dollar is going towards the cost of government and government services. A portion of the dime or the dollar goes to the federal government, sometimes another slice of it goes to the provincial government and in some cases all three governments take a share of that dime or that dollar.

Even those who have a dim conception that when they are purchasing commodities and services they are contributing towards the cost of one or more governments are not the faintest idea of what the proportion of the money they are spending goes for that purpose. If they did, it is more than probable that the governments would not be subjected to this constant bombardment for more and more expenditure.

As already intimated, it is difficult for people to appreciate and realize the cost of government and government services largely for the reason mentioned, but one authority, Capt. W. C. C. Innes, managing director of the Taxpayers' Association of Canada in a recent article in the *Labour Review* declared that "our contributions by indirect taxation have reached two-thirds of the total taxes collected."

The same authority states that the public debt is now approximately eight billion dollars of which \$800,000,000 has been spent or repaid in various forms with prospects that it will reach a total of one billion dollars in 1933. The annual interest on this debt, he states is \$500,000,000 which divided equally among the eleven million people inhabiting the country means an average yearly charge of \$28 per person. Very properly, of course, the total interest is equally divided, for those with larger incomes contribute a larger share than those with smaller incomes on the basis of one of the fundamental principles of taxation, "ability to pay."

Without An Asset

Of the many problems facing the country and which have been responsible for building up a heavy debt, Capt. Innes rightly regards the unemployment problem as the most serious, not only because of the large sums which have been spent on direct relief without any return for the expenditure in the form of assets, but because of the effect of this system of aid upon the morale of the recipients.

Reference has already been made to the beneficial effect of direct relief as exemplified in recent court actions and there is no question but that much of the cause for complaint against this type of aid would disappear if a policy of requiring some return in the form of work for the money spent by all the governments concerned in the administration of relief were adopted.

As Capt. Innes appropriately comments in the concluding paragraph of his article: "There is a growing tendency to rely on the governments for this, that, and the other thing, not only that we, the people, are the government, and in the long run we pay in full for our unthinking selfishness and folly."

Helped By Office Staff

Man Aids To Hold Job Because

Colleagues Were Kind

There is a story to match the one

we had a while ago about a member

of a Toronto office staff clubbing to-

gether to pay for plastic surgery to

the scarred face of a fellow employee.

A young chap in another local office

became deaf through mumps disease

by dying. The hearing was

affected by work and blighting his

life generally. Quietly his colleagues

chipped in and bought a hearing in-

strument for him—one of those won-

derful, inconspicuous things that

work by bone conduction of sound

or something. He could never have

afforded it himself, since he is the

main support of his family, and the

thoughtfulness of his workday as-

sociates has made things worth while

for him again. The incident is the best

proof that deafness would handicap

his future.—Toronto Telegram.

Napoleon Was Honored

Napoleon in 1802 was made an

honorary member of the American

Academy of the Arts and Sciences.

An Egyptian campaign led to finding

the Rosetta Stone, key to reading

Egypt's hieroglyphics.

THAT REMINDS ME— THERE'S MORE VALUE FOR THE MONEY IN OGDEN'S

"Roll-your-owners" get a lot more value for a dollar than they do for a dollar's worth of OGDEN'S.

Opten's for real money's worth. They know that OGDEN'S gives the highest percentage of smoking pleasure, that it keeps sure dividends in cooler, smoother, sweeter smoking.

No Commercial Value

But Islands Taken Over By Japan

Are Good Air Bases

The Japanese at Tokyo has

announced that Japan was assum-

ing jurisdiction over the Repub-

lic Islands in the China gulf—strategic

corridor group midway between French

Indo-China and British North Borneo.

France occupied the islands in 1953.

The group of seven islands have

an area of 247 acres but are without

great commercial value. However

they surround Japan which could

afford harbor facilities for seaplanes,

submarines and small naval craft.

Occupation of the islands by

France in 1953 was the first claim to

ownership since their discovery in

1867.

SELECTED RECIPES

BUTTER CAKE

2 cups sifted cake flour

2 teaspoon double-acting baking

powder salt

1 cup butter or other shortening

1 egg unbeaten

1 egg milk

1 teaspoon vanilla

Sift flour, cream, measure, add bak-

ing powder and salt, and sift. If

either three times. Cream butter

and sugar alternately with milk, a

small amount at a time, beating

after 3 cup cream and fold in 2 table-

spoons chopped candied ginger.

Spread bottom layer of crust

with about half of whipped cream; cover

with banana slices, and top with

layer, spread with remaining cream,

and garnish with border of banana

slices. Takes two to three bananas

measured.

JELLY TIER CAKES

Use recipe for Butter Cake. Bake

in greased cup-cake pans in moder-

ate oven (375 degrees F.) 20 minutes,

or until done. Split cake cross-

wise to make three layers. Beat 1

cup jelly with four units of right

consistency to spread. Spread be-

tween layers and top of cakes.

Spread bottom layer of crust

with sides of cakes. Makes 2 dozen cakes.

Salvador Dalí, prominent surreal-

ist painter, claims that it is enough

to paint a painting without being

asked to interpret them. Besides,

true surrealism should not concern

himself with such a minor matter as

meaning.

A new magnet about half the size

of a man's wedding ring, which picks

up a five-pound station, was recently

announced. This new lodestone is

the most powerful permanent one in

the world.

Is Your Back Sore?

If your back is sore

you can get relief

on several times a

day. You will find

Dr. Farn's Anti-

Backache very ben-

eficial. Mrs. Emily

Wright, 418 Henry

says: "My kidneys

are weak. I have

trouble at night.

My back is sore

and I have to get

up several times a

The Naval Race

United States To Build World's

Largest Battleships

The President has exercised the

right given to him by the Naval Ex-

penditure Act of 1916 and has given

the navy authority to proceed with

the construction of two 45,000-ton

battleships.

Behind the debate over the Naval

Expenditure Act, the Italian news-

paper story to the effect that Japan

had laid down two 45,000-ton bat-

tleships.

That story, printed in the Fall of

1937, has not been confirmed from

Japanese sources, but how success-

ful the Japanese are in guarding the

details of their naval building pro-

gram may be judged from the fol-

lowing. In a recent compilation of

information relating to the navies of

the principal powers, prepared by the

British First Lord of the Admiralty,

under Japan, battleships, building

and projected, is found the terse

entry, "Not known."

Presumably the President and his

naval advisers have discovered more

evidence than the Italian newspaper

article of 1937 affords that Japan or

any other Power is building battle-

ships larger than ours.

What, the 45,000-ton battleship

means to national defence the lay-

man perhaps is not qualified to say,

though he may be inclined to think

that it approaches, if it does not

touch, the policy of putting all your

eggs in one basket. Under the cost

of naval construction increases dis-

proportionately to the increase of

the tonnage of 45,000 tons may

be expected to cost in excess of

\$100,000,000 apiece.

For the available information

goes, the two battleships authorized

by the President would be the world's

most powerful battleships by dis-

placement, exceeding by 1,000 tons

the British battle cruiser Hood

and by 10,000 tons the battleships

which the French and British build

under construction.—New York Sun.

Natural Gas Dynamite

New Powerful High Explosive Is

Announced By American

Chemists

Natural gas dynamite, a new,

cheap, powerful high explosive, was

announced by the American Chemi-

cal Society.

The discovery means, it was

said, limitless quantities of high

explosives can be made from nat-

ural gas and steam alone.

A new chemical synthesis, dis-

covered at Purdue University, ex-

tracts from natural gas two new ex-

plosives, each as destructive as nitro-

glycerine, the high of all detonating

explosives.

The synthesis was reported by

Professor Henry B. Hildebrand, head

of the chemistry department, Purdue

University.

One of the new dynamites is made

from methane, common "fire-damp"

or marsh gas, and abundant in nat-

ural gas. The other is from ethane,

a common, odorless gas also found

in natural gas.

Each compound is a solid when

treated with formaldehyde. Nitro-

gen is then added. This makes a

mixture which can substitute for

nitroglycerine.

Germany Buys Cotton

Takes Entire Crop From Nicaragua

Not Normal Music

Jazz Result Of Cultivated Musical

Depravity States Authority

There has somehow been circula-

ted the idea that jazz is the normal

music of the common people. On the

contrary, it is highly artificial, the

result of a cultivated musical de-

pravity, says Dr. James Francis

Kennedy in the *Etude*. A few years

ago, an explorer took a field-study

on an expedition to the jungles of

the Orinoco River. The white man

almost invariably dominated the

Indians, who had never heard

of the jungle, who had never heard

any white man's music, went into

captivity over grand opera and sym-

phonic concerts. And when Ken-

ted Kennedy travelled 30 to 50 miles

by wagon and by mule-back just to

hear a program at a "listening broad-

HAD DIZZY SPELLS FOR 3 YEARS

Result of Acid Indigestion

"Before taking Kruschen's," a woman writes, "I had very bad dizziness and flat flatus, an episode of acid indigestion. I was so nervous at times that the least thing would upset me. I was about three years in that condition. "I could not tell you in words how happy and glad I am to-day that I have Kruschen's Salt. A trial I have now taken them for 18 months. I would not miss them one day. They are a great help to anyone who suffers from flat flatus and indigestion. I now feel no bright and cheerful. Kruschen's Salt has kept you fit and fine." (Mrs.) J.M.

Kruschen's Salt is an excellent reagent for maintaining a condition of internal cleanliness. The numerous salts in Kruschen stimulate your internal organs to move, require action. Your inside in this kept free from those impurities which, when allowed to accumulate, give the whole tone of the system.

WORLD HAPPENINGS BRIEFLY TOLD

Government authorities in Russia announced a plan to train 100,000 men as tractor drivers and airplane men drivers in event of war.

Devised for simplicity and speed a new army drill movement reducing the column to three has replaced "form fours" on the parade grounds of Britain.

Chancellor Hitler has given Admiral Erich Raeder, commander-in-chief of Germany's expanding fleet, the title of grand admiral, a title Germany first since the Great War.

Jan Masaryk, son of the founder of the Czechoslovak republic, predicts that Germany will conquer the Czechs "the most indestructible people in the world."

A plan for continued friendship between China and Canada was made by Shao-Ying Shih who arrived at Ottawa to assume his new duties as Chinese consul-general.

The department of Indian affairs office announced at Vancouver construction of a new \$200,000 Indian residential school at Port Alberni, B.C., will begin as soon as plans are completed at Ottawa.

Baron Rudolf von Moresau, 29, killed in a crash during test flight. He was a member of the crew of the German plane Condor which made a Berlin-New York flight last August.

Production and sales of radio receiving sets in Canada last year showed declines from 1937, the Dominion bureau of statistics reported. Production dropped to 242,721 from 289,247 and sales to 231,290 from 265,655.

Two armed men held up about 30 Chinese playing a Chinese lottery game in Winnipeg and escaped with approximately \$20,000. The men used a revolver and a rifle while they scooped up the money.

A Real News Item

General Manager of U.S. Railway Forced to Hitch-Hike

You've heard the one about the man hitching the dog. Well, the general manager of the Southern Railway hitch-hiked "hitch" Rock Hill, South Carolina. The engine to a Southern passenger train, which G. W. Adams private car was attached, broke down outside of town. Adams stuck out his thumb and caught a ride into Rock Hill with a motorist. Fortwith he ordered another engine and held up the train line.

Tongues Of Birds

The humming bird's tongue is in reality a long pipe which is thrust into blossoms to extract the sweet nectar. Woodpecker's tongue is a long, thin, sharp projection that sticks to bits of insect life. Even insect tongues are too small to be seen by the unaided eye are taken from bark and other places.

The Silver Jubilee is the world's fastest long-distance train. Running from King's Cross to Darlington, England, it covers the 232 miles in 188 minutes.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change years from 40 to 45, when her hair and her skin are at their best. Kruschen's Salt is a great help to anyone who suffers from flat flatus and indigestion. I now feel no bright and cheerful. Kruschen's Salt has kept you fit and fine." (Mrs.) J.M.

Kruschen's Salt is an excellent reagent for maintaining a condition of internal cleanliness. The numerous salts in Kruschen stimulate your internal organs to move, require action. Your inside in this kept free from those impurities which, when allowed to accumulate, give the whole tone of the system.

Woman Pearl Fisher

Supervises Working Of Three Boats With Crews And Divers

Mrs. J. E. Edwards, of Darwin, Australia, must surely be the only woman who has ever taken to the sea in the machine of pearl fishing. With the aid of her son she supervises the working of three pearling boats, each with a crew of four, including one or two Japanese divers.

Mrs. Edwards has had her pearling experience from her husband who, until his death, had a schooner and a fleet of 20 boats. In those days Mrs. Edwards was an ardent of losing her young children overboard that she used to dream them in bright red in order to look them conspicuous.

Had To Do Something

No Boarding House Keeper Gave Damaged Pie A New Name

A boarding house operator had the misfortune to let the pie, which was baking for dinner, fall. She was in a hurry to make it, and took a chance that the boarders would not ask questions about the broken crust.

However, one of them asked: "What kind of stuff is this?" "Oh, that's a new kind of pie I read about in a book to-day," she replied.

Delicacy For Chinese

But Most People Would Not Relish Weaver Tail Meat

Amplified for a better tail, as explained in the Lindsay Post by a Chinese resident of the town is proved by the eating. He says a heavier tail is a delicacy and might get anything up to five dollars on the New York market. He solved the mystery of why he found anything eating on a beaver's tail by pointing out that there was meat in the fat tail when Chinese eat the tail with their hands. He says the tail is very much eaten by white people in American restaurants and is exceedingly palatable.

A Foreign Capital

Frags in Hill That To Berlin Telephone Operators

Prague still is a foreign capital so far as Berlin telephone operators are concerned.

A newspaper correspondent trying to get a call through the Prague heard the operator say to another: "How will we figure the charges on that? Is that in Germany or is it a foreign call?"

"That is a foreign call," was the reply.

Gardening

Special Planners

For full sun, especially if planted close to a South wall where there is an indication of inferior stock. There are things such as coriopsis, nasturtium and other plants, portulaca or climbing morning glories and These give remarkable results even in a large of dry weather.

Like seed, it is important to secure nursery stock (roses, shrubs, vines, etc.) from a reputable source and that is familiar and caters to Canadian conditions. This sort of planting material is offered in a wide range of prices but as a rule cheap stock proves disappointing.

Good stock is pliable, green and has an indication of inferior stock. If it grows at all, a year or perhaps more, it will grow really likely to make any real growth.

New grains and fruits are not the only thing that have been occupying the attention of plant breeders in recent years. In vegetables, there have been even more improvements. Scientists have carried out this work for years, and the result is a vast production of vegetables unfamiliar to most Canadians, and secondary and probably more important, by vast improvement of those varieties that have been grown in this country for years.

The Non-Worriers

Dr. George Crile, Cleveland, O., gland surgeon, told the sessions of the American College of Surgeons that his research showed Eskimoes, Indians and Orientals with a non-worried attitude to life did not suffer from the nervous diseases as do too much brain work.

Great British imports approximately 225,000 eggs from Poland annually.

Call For Leadership

Says Farming Industry Is Suffering From Lack Of Foresight

A call for leadership to show Canadian agriculture the way out of its present "crisis" was voiced by Dr. H. W. Brittain, dean of agriculture at Macdonald College, St. Anne de Bellevue, Que., in an address to a banquet of the Eastern Agricultural Conference.

The leadership needed is not possessed of "superior training and intellect and character leading to new achievements of the human spirit and the human personality," the speaker declared.

For the last 10 years, Dr. Brittain said, agriculture in the Dominion has been in a condition of distress. The industry was suffering from "the haphazard nature of our development and from our lack of foresight and courage in dealing with such problems."

A fundamental problem growing out of the situation was that of the "marginal farmers." "In some parts of the country," he said, "We are manufacturing poor farmers, through our neglect, our ineptitude, and our indifference to the human factor, an essential element in any satisfactory and permanent solution of our problem."

Dr. Brittain said Europeans who attended the international economic conference at St. Anne de Bellevue last summer had been "appalled at the waste they saw in this country. They considered any people who would tolerate such conditions were not worthy of the heritage we possess, and some of them were shocked to find the moral right of any people to hold for themselves vast and rich territories in a state of such incomplete development."

Flour Milling

Industry Carried On In Canada For More Than 300 Years

The Canadian flour and mill industry which has existed to meet the country's domestic needs for more than 300 years is one of the Dominion's oldest manufactures but it is only within recent years that its progress has become spectacular. The demand created by the World War gave a great impetus to the trade. The 335 flour mills, many of them of the most modern type and highest efficiency, have a capacity far in excess of Canada's demands and during 1928 the industry produced five capacity of 121,000 barrels per day. Since then, the industry has been affected by the difficulties in selling the grain trade and the decline in grain prices, but in spite of the Canada continues to be one of the world's leading exporters of wheat flour.

Men At Their Best

Some Men Accomplished Much When Late In Life

Many little have been drawn up to show that all men are not useless when they reach mature years. The Commissioner, at the first meeting, offered the following: Between the ages of 70 and 83 Commodore Vanderbilt added about \$10 million dollars to his fortune. Keat 75 wrote his Metaphysics of Ethics, at 74 his Autobiography. Turgenev at 74 completed painting his vast Paradise, a canvas 74 by 30 feet; while Verdi at 73 produced his masterpiece, Otello, at 79 Falstaff and at 85 the famous Ave Maria. Cato at 80 began the study of Greek; Goethe at 80 completed Faust. At the early age of 80 Tennyson wrote Crossing the Bar, while Tilton topped all the boys by painting his historic picture of the Battle of Lepanto as a youngster of 98.—Edmonton Journal.

Liked Clean Autos

Man In Wisconsin City Had Very Queer Hobby

A tall, elderly man with lanky legs walked along a street in Green Bay, Wisconsin, kicking mud and ice off car fenders, and wiping off head and tail lights. Nobody could figure it out, not even the policeman who took him in tow. "I hate to see dirty automobiles," the tall man explained. "I haven't an automobile myself. If I had, I'd keep it clean." He was released.

Very Good Definition

Gabriel Wills in the New York Sun asks: How would this do as a definition of a gentleman? "A gentleman is one who knows his place." This sums up the three elements that go to the making of a gentleman. Regard for self, regard for others, regard for authority. The opposite of a gentleman is a snob: One who does not know his place—high or

Publishing an up-to-date star is as tricky as getting out a Hollywood magazine with all the stars married to the right people.

Deserves Great Credit

Heart Massey Has Not Let Handicap Get Him Down

A London sporting writer offers the opinion that if there were a prize for the outstanding athletic achievement of recent years it should go to Hart Massey, son of the Canadian High Commissioner in London, Vincent Massey, for winning his "blue" as cox of the Oxford University boat which recently raced against Cambridge. The man who row in that famous race are nearly all giants. On their strength and endurance largely depends the result. But they cannot row "blinds." The one always a much lighter man, has, during the course of the race, to manage the big fellows facing him. He has also to watch the other crew as well as his own. He must know not only how to take advantage of the water by steering the right course, but when he will order the men to take it easy or make their supreme effort. Without his agile and observant mentality to guide them the crewmen would be helpless. They must reply to his commands. He furnishes the brains.

Hart Massey is handicapped in life by a physical disability. Any young man of lesser grit would have sunk under it long ago and never made anything of his life. He stands but four feet, two inches, and weighs but 72 pounds. He will never grow any more. When he was six years of age he had a tumor on the brain, and in removing the growth the pituitary gland was destroyed. From that time his growth ceased. His height at six years of age will be his height all his life.

In all other respects young Massey is normal; in intellect he is far above average. He was top of his class at Upper Canada College. He is a capable student at Oxford University ever instructed. It is a first-class painter. At Geneva he drew caricatures of the Aga Khan, Lord Bismarck, the Premier of France, and many other notable men. He is pleased with the pictures that they autographed them. Mr. Massey has had an exhibition of his work. He is an excellent comic, tap-dancer and impersonator, he plays golf and squash rackets with skill and vim. He has a special car made for him and has motored through Switzerland in it.

Although he admits that he is "fed up to the teeth" about his height, he has a sense of humor. He is a very good swimmer and a nursemaid will one day swim with him and put him in a "pram." But a nursemaid is not the kind of person he needs. He is a normal physical and intellectual life in an example to other who sit at down and bewail their misfortune. —St. Thomas "Times-Journal."

May Become Air Base

Sussex Coast Harbor Suggested For Trans-Atlantic Landing Place

Pagham Harbor, on the English coast near Bognor Regis, may become the air base for the projected trans-Atlantic flying boat service and also for the existing Bognor service. Flying boats on the Empire routes at present use crowded London airports as a base but the air ministry is anxious to find a suitable spot free of ocean traffic; not only for an air base at Portsmouth broken down last year.

Pagham Harbor is how derelict but experts estimate it could be turned into a suitable base at a cost of about \$500,000 (\$2,700,000) including purchase of the site. A dam would have to be built across the harbor entrance and a land airfield for land plane service.

Pagham is only 70 miles from London, the same distance as Southampton and Portsmouth.

An Old Lightship

Century-Old Boat Has At Last Gone To The Boneyard

A battered old tub of a vessel, towed into the Thames estuary a century ago, is going home to rest its harnessed-curled sides in a shipbreaker's graveyard. Many grandfathers or great-grandfathers of Canadians stood at the rails of steamships and watched the bulb-topped mast of that old ship fade into the haze after her hull and the white letters M-O-B-E and dropped below the horizon.

The more lightship, oldest of her kind afloat, was manned by crews who saw sail give way to steam, steamships encroach on the domain of steamships and aircraft drive outboard, harnessing a new age of fast transport, her officers and men worked two months on and two off. Her successors look like a luxury yacht on a cruise.

Per capita consumption of apples in the United States is half an apple per day for every man, woman, and child.

SOLDIERS, NATIVES OF TUNIS, DEMANDED BY ITALY

The Italian Premier's latest demands include the French colony of Tunisia in Africa. However, the natives have expressed their reluctance to trade their French colonial troops during manoeuvres in Tunisia and, bottom, natives staging as an answer to Mussolini a French mass meeting in the city of Tunis.

A Centenarian Fish

Age Of Sturgeon Was Determined By Counting Bar-Rings

When a great sturgeon, 767 pounds in weight, was captured last year in the Fraser River, in British Columbia, examination of its ear-rings proclaimed the fact that the big fish had seen a century come and go. Counting the smooth (ear-bone or ear-stone) rings is the method of determining the age of some fish. In the case of the big Fraser sturgeon the rings were counted by an inspector on the Dominion Department of Fisheries, among others, and he vouches for the statement that there were more than a hundred of them. Age, by the way, had not made this fish decrepit by any means; it put up a hard battle with every one of its 767 pounds when it found itself trapped in a fisherman's net.

Sturgeon are taken in both sea and freshwater fisheries of Canada but the larger catches are landed in inland waters of Quebec and Ontario.

Sometimes called "the royal fish," the sturgeon is perhaps best known to most people as the source of caviar, which is prepared from the roe of the fish. Canadian production of caviar is small, however, something like a couple of thousand pounds a year and nearly all of it is put up by Ontario fishermen—Canada's Westly, London.

Might Be Grumpy

In the fourth-floor corridor of the Times Annex, says The New Yorker, an eerie little notice is posted: "Please keep the windows closed as when open a devil comes into the hall. Your hall porter."

Has Many British Ideas

Possible That Don Juan May Be King Of New Spain

If, as Spanish observers predict, King Alfonso's third son is placed on the throne of the new Spain in the near future, Great Britain will have much cause for satisfaction. For the Infante Don Juan has many close ties with this country—of training and temperament as well as of birth. He spent four years in the British Navy, and left it much against his will when he became heir to the throne. He once said that his greatest ambition was to become an Admiral in the British Navy. Don Juan is a young man of fine physique, and is fond of sports of all kinds. He is the only one of four brothers who is not afflicted with hemophilia, the dread disease which pursues the male line of the Bourbons.—News of the World.

How About The Answers

Politicians Should Know Their Own Well As The Questions

Once there was a political story going the rounds, says the Vancouver Province. A man was elected a particular politician. "He is exceedingly well up on all the political questions of the day," he declared emphatically. A skeptical friend replied, with devastating effect: "How is he on the answer?" Some of the political movements under way in Canada just now recall that story to mind.

Reason is progressive; instinct, stationary. Five thousand years have added no improvement to the live of the bee, nor the house of the beaver. 30,000,000 pounds in 1933.

National Register

Australia Decides To Substitute This For The Voluntary Plan

Prime Minister Joseph Lyons announced the Australian cabinet had decided to institute an obligatory national register instead of the voluntary register originally proposed. Legislative measure carrying out this decision will be submitted to parliament at the opening of the forthcoming session. The register will provide a roster of men fit for military service in the event of war. The prime minister also announced the government had decided to adopt recommendations of the British aviation mission now in Australia on establishment of aeroplanes construction plants at Sydney and Melbourne.

Assembly plants will be established at railway workshops in New South Wales, Queensland, Victoria and South Australia. They will be supplied with parts by private factories under contract to the government, Mr. Lyons said.

Hybrid Grapes

Experiments In B.C. May Result In Reducing Imports From France

A "hybrid" grape suitable for extensive growing in British Columbia may be developed in experiments at the Dominion Experimental station at Interlaken-Burnside. Professor A. H. Brown of the University of British Columbia told the B.C. Professional Gardeners' Association of the experiments. If such a grape were developed, he said, Canada might be able to cut down her immense annual importation of grapes from California which totaled 30,000,000 pounds in 1933.

Safety Not Assured

Enemy Air Force From Far East Could Bomb Canada

Canadians who regard it as well beyond the range of probability that Canadian territory will be threatened from the East by an enemy air force may be interested in learning that the far-city of Singapore, in the South West, with its huge population, vast docks, and crowded area, has become thoroughly aware of the danger of the great possibilities of modern warfare and to a realization of the fact that the organization of civilian safeguards against hostile air raids has become as necessary a part of national defense as the construction of planes or the training of an army.

The New South Wales Government has accordingly formulated plans for air raid precautions, and it is now enlisting the enthusiastic support of the population of the New South Wales metropolis. Australia's air programs are being extended, and arrangements have just been completed to manufacture military aircraft in the Commonwealth on a large scale, thus making a substantial increase in the number of Australian, but to the larger aspect of Empire defense.

One of the facts of the fact that Sydney is 4,500 miles in a direct line from Tokyo; whereas Vancouver is 4,350 miles in a direct line from the Japanese capital, the wisdom of the Canadian authorities in getting ready their air bases will be manifest to those who prefer to retain the traditional ostrich attitude.—Montreal Star.

No More Homesteads

Policy Led To Occupation Of Land Unavailable For Farming

The decision of the Alberta Government to do away with homestead means a sharp break with the past.

There were only a few people in Western Canada when that settlement plan was adopted in 1872. The opportunity to secure a free grant of 160 acres proved a most powerful lure. Without it the prairie would have been populated as sparsely as it is today.

This has to be recognized, even though time has gone by, the weakness of the system have become more and more apparent. It has been the cause of the waste of the occupation of a great deal of land that was unsuitable for ordinary farming purposes.

The waste would have been spared many of its present troubles if there had been more control over settlement during the period when homesteads were being taken up in large numbers.—Edmonton Journal.

Seeds From A Tomb

After Many Years Tombs Contained Some Neglected Little Treasures

Several odd-looking seeds discovered recently in a more than 13-century-old tomb at Jago, Hainan Island, China. Botanists have begun to sprout into phoenix trees, which are found only in the western part of the island.

They are growing at the Koshikawa Botanical Garden in Tokyo. The seeds were discovered by an amateur botanist, Daisuke Shimizu, of Chichibu, Saitama prefecture. They have the shape of an oval, 6.8 to 7.3 millimeters in length and from 4 to 4.4 millimeters in diameter. Their color is pale brownish yellow. They budbed 13 days after they were given soil by an expert of the Koshikawa Botanical Garden where they had been sent by the amateur botanist. —Japan Times Weekly (Tokyo).

Get Special Dispensation

Lobby Fights At Ottawa Are Expected From School

Sixteen boys ranging from 10 to 16 years of age run messages for members in the commons at Ottawa. Instead of going to school. These pages get a special dispensation from the House of Commons and don't seem to lose much by being away from the classrooms. As one little lad puts it: "You learn more in parliament sometimes than in school."

Many pages have risen to high civil service position. Tommy Gorman, the Montreal hockey man, was a page in his boyhood. There is something about the page and the government and opposition lobby pages. The boys are paid \$1.75 a day.

Whales can dive a mile below the surface and rise immediately without out of breath. A chemical adjustment of their blood gases for the variation in pressure.

California has an oak-tree with a geyser spouting from its roots.

MAGNIFICENT PAINTING OCCUPIES MOST PROMINENT PLACE IN GUILDHALL

Above is a photograph of the presentation by Lord Walsdale of the magnificent painting of "The Coronation of the Guildhall." The picture depicts the Coronation luncheon in the Guildhall and has over forty portraits. It is the work of Mr. Frank O. Salisbury, who is seen at the right between Lord Walsdale and The Lord Mayor of London.

UNIVERSITY OF CANADA

SASKATCHEWAN
Courage and Achievement!

★ Co-operation among
Canada's nine Prov-
inces means more than
a strong Dominion. It
is vital as well to the
welfare of each individual Province.
Each gives to the others; all are bound together
in ties of mutual interest.

IMMENSE — her 200,000,000 arable acres,
larger than Ireland, her total area 5,000
square miles bigger than the British Isles and
Sweden combined. Is just at the beginning of
her greatness — just getting into her big
stride, with her near million of people on the
job, producing something like \$500,000,000
worth of real wealth every year. The kind of
people who suffer temporary reverses in years
of bad luck, and yet who never falter in
their belief that all will eventually come
out right.

Saskatchewan: Set one of the world's records
for rush to farm lands — increased her population
ten times over from 1901 to 1931 — mighty pro-
ducer of wheat and all other grains — enormous
grower of live-stock (exported in 1937, 236,000 tons
of them) — has 77,000 acres under irrigation,
mostly in what was formerly known as "the dust
bowl" of the West. She has mines of gold, copper,
zinc — traps a million dollars worth of fur-bearing
animals — has her share of that almost fabulous
gift, the Pre-Cambrian Shield.

She is beginning to develop her own manu-
facturing activities, and Eastern industrialists are es-
tablishing within her borders their Western plants for
making paints, motor cars; others are on the way.

She imports from and exports to all parts of
Canada. Our own motor manufacturing people,
numbering with their dependents over 132,000
people, are good customers of this great province.
She has developed her broad miles of farm land by
using mechanized farm implements, and has over a
hundred thousand registered cars of all kinds,
with trucks and motor buses.

One of the great provinces, no two of which
are alike, but all contributing the things that make
Canada one of the great nations of the world.

Ask for Facts and Figures on the Annuities
Industries and the work they are doing in Canada.
We will send them.

BUILDING CANADIAN MOTOR CARS is a National Enterprise

The automotive industry means
more to Canada than to any other
country. It is the backbone of our
economy. These cars are not the start of an
impressive equipment chain reach-
ing from the raw materials of iron
and steel to the finished product.
They are the result of a long and
complex process. They are the
consequence of 15,000 more people,
a total of 30,000 directly dependent on
the automotive industry.

Let us add that a percentage of the
ships that feed and clothe them
and the products and tools that
enable them to do so, and you have a
real picture of the importance of
the automotive industry to Canada.
The automotive industry is
national in scope. When you
buy a Canadian-built car,
you help your own Province.

AUTOMOTIVE INDUSTRIES OF CANADA
1906 LUMSDEN BUILDING — TORONTO, ONTARIO.

This advertisement is one of a series dealing with the Production of Canada, and will appear in many daily and weekly newspapers in the Dominion.
